

CHRISTOPHER LE

Orlando, Florida • (321) 424-7265 • clechris063@gmail.com

PROFESSIONAL SUMMARY

Information Technology undergraduate at the University of Central Florida with hands-on experience in autonomous AI workflows, CRM automation, and networking fundamentals. Currently engineering agentic LLM systems and operational guardrails at dasFlow, complemented by 100+ volunteer hours of high-reliability operations at Orlando Health. Strong technical problem solver focused on building scalable, secure systems at the intersection of AI, infrastructure, and enterprise technology.

TECHNICAL & PROFESSIONAL EXPERIENCE

- dasFlow Custom Athleisure Apparel**
AI Automation & Systems Intern

Winter Park, FL (Hybrid)
August 2026 – Present

 - Autonomous Workflow Architecture:** Design and deploy agentic AI pipelines and LLM automations to eliminate manual operational bottlenecks across client intake and production.
 - CRM & Systems Integration:** Engineer direct integrations between AI agents and HubSpot CRM to streamline lead triage, data synchronization, and automated order routing.
 - System Constraints & Safety:** Formulate operational guardrails and validation constraints to safeguard live customer data and prevent unauthorized automated execution.
 - Testing & Optimization:** Conduct iterative sandbox testing of agent logic, prompts, and triggers to guarantee resilient performance before production deployment.
- Orlando Health – Orlando Regional Medical Center**
Operations & Patient Services Volunteer (100+ Hours)

Orlando, FL
March 2025 – Present

 - Clinical Unit Operations:** Assembled and sterilized ~60 surgical and anesthesia circuit kits per shift in high-volume OR environments under rigorous safe-handling protocols.
 - Inventory & Compliance:** Audited over 500 clinical stock items weekly, eliminating expired supplies and sustaining quality compliance with zero errors.
 - Communication & Triage:** Facilitated rapid telephone triage and guest services across Intermediate Critical Care (3C ICC), maintaining strict HIPAA confidentiality and patient care coordination.

EDUCATION

- University of Central Florida**
Bachelor of Science in Information Technology (GPA: 3.68)

Orlando, FL
August 2025 – Present

 - Relevant Coursework:** Computer Network Concepts (CNT 3004), Systems Architecture, Information Security, Network Analysis.
- Valencia College**
Associate in Arts in STEM (GPA: 3.62)

Orlando, FL
Conferred August 2025

TECHNICAL PROJECTS

- Agentic Workflow & CRM Pipeline**

dasFlow Engineering

 - Engineered end-to-end automated pipelines connecting LLM models to HubSpot CRM, automating account progression from initial consultation to manufacturing specifications.
- Modular Simulation & User Interface Engine**

Independent Project

 - Programmed an interactive application in Lua utilizing object-oriented principles, asynchronous event handling, signal-based logic, and custom UI components.

TECHNICAL SKILLS

- AI & Automation:**

Agentic AI Workflows, LLMs, Model Context Protocol (MCP), Zapier, Make, Prompt Engineering
- Networking & IT:**

Computer Network Concepts (TCP/IP, UDP, DNS, HTTP), Wireshark Traffic Analysis, Systems Administration
- Tools & Platforms:**

HubSpot CRM, Python, Lua, Google Workspace, Microsoft 365, macOS/Windows, 110+ WPM Typing
